US3R_NEXY2	07-JUL-20_23.44.56	No.43765	A little heads up on the government working group recommendations. The ultimate symbolic purpose of the mask. The mask will be mandatory for all citizens who have not taken the vaccine. There will be stop and search on the streets by Covid Task Force. There will be sign in to events and public buildings. Certificates on devices must be shown. Those without devices must have a 'valid wearable technology' in public. Whether electronic wristband or similar. Tattoos are mooted for the vaccinated. These recommendations, if they can be slid through the cabinet, will be shared at the Health and Education Authority level, and passed through the Trusts to the local social services. Schools will be tasked with a programme of, well... brainwashing, I'm afraid, so that children grow up with no different way of life other than 'The Covid'.
US3R173652	07-JUL-20_23.45.24	No.43766	Those who refuse to wear the mask, or who try to claim health reasons, will be confined to their homes. Probably for the rest of their lives, if they don't volunteer for the suicide shot.
US3R200677	07-JUL-20_23.45.44	No.43767	^43765 What happens when the vaccinated start to develop health problems? Any chance of disclosure?
US3R_NEXY2	07-JUL-20_23.46.00	No.43768	^43767 Not if the law has been amended to prevent it. It could be more than a fine or losing ones job. It could be classified as a 'risk to the public health' and carry a prison sentence. And we all know what that means. Remember, the medical profession already have immunity from prosecution if people die in their "care". There will be concerted downward pressure to ensure compliance within the service, while the mob patrol the streets, looking for dissidents to report.
US3R173652	07-JUL-20_23.46.18	No.43769	This has extraordinary parallels with the old middle eastern religions that controlled populations against diseases like leprosy, syphilis and plague with ritualistic laws. There was 'social (physical) distancing' from the leprous (four cubits by all accounts, which equates to roughly 6ft or 2m).
US3R_NEXY2	07-JUL-20_23.46.44	No.43770	Those sympathetic to that, will point out that they had 'found the right solutions' all those years ago, although the 'solution' has no grounding in practical medicine. It is a psychological operation against the people it seeks to subjugate.
US3R173652	07-JUL-20_23.47.02	No.43771	So, mask wearing is a statistical analysis of social compliance.
