

Double Dagger

US3R764288	01-OCT-20_20:22:43	No.70248	<p>Think about it. Around the world there are thousands of doctors signing open letters to their governments stating that the medical solutions to the 'coronavirus' is complete nonsense.</p> <p>Why do no governments even listen to it? Because it is an inconvenient truth. The Coronavirus and its associated lockdowns, economic disruption and social penalty simply has to happen.</p> <p>Why?</p> <p>Because, unknown to the general public, the world is currently at war. This is the third and final banker's war. The one they have tried to wage so many times before. Right now, the only tanks that are rolling are positional, not aggressive. Think of the Chinese-Indian border. The only strikes have been against the Chinese military in the summer of 2019 and a couple of poisonings of retired double agents. But this is only the overture. Like the early days of world wars one and two, the attitude is still that it 'will all be over by Christmas', whereas the truth is that like the last two, this will be five years of attrition, ending in a decisive victory and a complete dismantling of the old world.</p> <p>We can understand the war against Trump by the globalists who wish to find a cover for stealing the Novemeber 2020 election, but what does the rest of the world have to do with it? Again, why the lockdowns over a cold virus? Why the fiddled figures to make out it is more dangerous than it is? Why ignore the obvious cure of Hydroxychloroquine, Azithromycin and Zinc? Do they actually want us locked in our homes, and if so, what can they gain by it?</p> <p>After the strike against the Chinese military in 2019, when a western engineered nerve agent was released amongst elite Chinese troops in their barracks, the dangerous game has been escalated.</p>
