US3R547227	05-OCT-20_22:15:40	No.70301	Here it is, one more time.
			The end game of the great hoax is to implement an identity papers system in the western world (and eventually the whole world), by requiring everybody who wishes to 'participate in society' to carry a social passport, or a Global Identity. This will comprise of a series of certificates and permissions based around a medical nonsense that can be attached to your DNA, and hence identify you at any point at which papers have to be presented. At first travel will be restricted. Then, it will govern which public buildings you can enter and with whom you can interact. If you choose to stay at home and buy and sell online, you will find that the requirements of Global ID will creep forward, so that you will need your Global ID to access the internet to purchase everything, including food. It s a great displacement of the way of life that we have known in the west since the rfelaxation of feudalism. This way of life will negatively impact all people who value their freedom and independence. Those who wish for self-determination and the intellectual freedom to think, speak and act according to their personal vision of life will be reduced to the status of a farm animal. For many people, and perhaps there are now an overwhelming amount which is why the time is right, being told what to do, where to be and how to behave, will appear perfectly acceptable. Their mental health is low, intelligence minimal and will to succeed at life is gone. They will accept whatever is done with them, and may even comprise a mob of useful idiots to harrass the last of the free thinkers in society who reject the new order. In a society where the right to bear arms has been suppressed, the government has a monopoly on weapons and the forces trained to use them. Watch for the gradual encroachment of armed forces on the streets "helping" citizens to be compliant with the government's new laws. When that time comes, you will know that the window of opportunity for resistance is rapidly closing.
