

Larp Rising

US3R733652	04-NOV-20_11:21:03	No.7010	It leads me to think that people really have no idea what they are walking into.
US3R629638	04-NOV-20_11:22:22	No.7011	"This is the biggest gaslighting operation since the second world war." I just hope that this gets exposed, for the sake of any future elections (if there ever are any.) It's been out in the open since July, and now they've gone an done it. Is there something we don't yet know about?
US3R113664	04-NOV-20_11:22:32	No.7012	^7010 The level of dissonance over here in the UK is frightening. People are distracted with the corona larp, and their take on the US situation is jaw-dropping. I think your editor is spot on, but if he has a sense of the past, does he also have a path to the future?
US3R439781	04-NOV-20_11:22:49	No.7013	They had four years to clear up the mess. I saw the Hacking Democracy video years ago about the 2000(?) election, and I thought they would have had this sorted before Obama was first elected. The rumours going around about the current shenanigans are unbelievable! And there are videos, whistleblowers etc to back it up.
US3R733652	04-NOV-20_11:23:41	No.7014	^7012 Probably, and it's not one you'd want to take! History, if that's what we're running on, never restores the past, it always leads us into a new place - for better or worse.
