US3R_SH667	08-AUG-20_20:18:07	No.6171	<p>"THE VIRUS IS REAL, THE PANDEMIC IS A HOAX"</p> <p>The virus is an overture. All the confusion in government and industry is just the audience late to their seats.</p> <p>The push for tracking and tracing is the most important feature right now. It's being spun in the media as 'already justifiable'. People were told that if they wanted to go to pubs and restaurants they had to give their names, addresses and phone numbers. As has become obvious, this was stupid and impractical, and served no overt purpose. However, it allows for 'members of the public' to phone the places afterwards and claim they've 'tested positive for the virus', causing not only the businesses to shut down again, but the 'contact tracers' to start adding data to the new model of social interaction.</p> <p>New model involves controlled travel, purchasing decisions (what you are allowed to buy and how. What products are to be 'cancelled' and who is to be blocked from buying and selling), personal interaction amongst groups, and the advent of 'new rules' on free speech within regular internet chat spaces. All this will come out of the hoax pandemic.</p> <p>Governments, clearly under the control of the WHO, will use their shaky infrastructures to fire up and then shut down areas of the economy, bringing the virus back whenever they need to wield the stick. The WHO are determined to get their cut of the worthless and possibly dangerous vaccines that are about to be pushed on the public.</p> <p>Is it all about money? Of course not. Running a farm for profit is one thing, but an industrialist doesn't stop at a few hundred acres in the sunny countryside. He wants giant urban processing plants with killing floors and conveyor systems, where the product is described and evaluated by their barcode.</p> <p>Have you noticed the 'exclusion zone' around children? It seems that trying to bully adults into some sort of surreal compliance is justified, but they leave children alone. So far, the 'experts' have explained away the lack of coronavirus among children with idiot logic (the virus attacks the immune system, and as kids' immune systems are not well developed, they've been spared). They know that if there really was a deadly virus that was wiping people out, it would wreak havoc amongst kids, and then the public would rise up.</p> <p>Leaving kids out of it, makes it an adults only psyop.</p> <p>The good news is that people will wake up. The bad news is that it won't be until they're stood in line next to each in a cold bitter gulag.</p>
